We tried ...

What: Sciton ProFractional-XC, a laser procedure that resurfaces the skin a column at a time. This is a treatment that claims to lighten pigmentation, and get rid of wrinkles, stretchmarks, acne scars while firming the skin. Unlike other resurfacing procedures, this one does not strip off the surface skin, allowing for faster healing time.

Who: Cindy Foo, promotions coordinator

"The treatment was slightly uncomfortable but the pain was bearable. My large pores are now noticeably smaller and my skin tone is more even. The fine lines around my eyes are also noticeably less visible. The treatment, however, did not do much for my acne scars."

How much: \$1,088

Where: Asia HealthPartners, #05-06 Lucky Plaza. Tel: 6235 8411.

What: Mentsu Intensive Facial

Who: Shi Tianyun, editorial assistant

"What's unique about this beauty store is the conveyor belt of individually packed skincare sachets, which I loved cos I'm big on hygiene. And, I was able to select products to fully customise the treatment to my skincare needs. Although I found the extraction process rather painful, my skin felt softer and looked more radiant immediately after the treatment."

How much: \$45

Where: Mentsu, #05-23/24/25 Tampines 1. Tel: 6481 6166.
